

FEEDER ROADS ALTERNATIVE AND MAINTENANCE PROGRAM

Request for Quotes: Supply of Bitumen for Road Surfacing

Background

The Feeder Roads Alternative and Maintenance Program (FRAMP) is a four-year USAID funded project being implemented by Cardno Emerging Markets USA, Ltd. Through FRAMP, Cardno will oversee the rehabilitation of 450km of rural roads, test different low volume seals, develop a community-based maintenance system and build the capacity of Liberian construction firms, public sector engineers and planners, and community-based organizations (CBOs) to manage the road network.

For the construction of the test sections of sealed road, Cardno is requesting quotes for the supply of various types of bitumen. Quotes should contain the following information:

- Company Profile
 - Business Registration
 - Contact Information
 - Reference Clients, preference given for clients in Liberia
- Cost, Availability, Full Technical Specifications, and Timeframe of Delivery to Monrovia of the following:

Bitumen	Estimated Quantity
80/100 Penetration	25 Metric Tons
Modified Cationic Emulsion	25 Metric Tons
150/200 Penetration	130 Metric Tons
MC30 (optional)	25 Metric Tons
MC3000 (optional)	45 Metric Tons

- For branded products in the list above, feel free to submit details of similar quality and specification bitumen.
- Ownership of the supply will be taken by Cardno at port in Liberia. Seller is responsible for all insurance and transportation costs for international quotes.

Quotes can be submitted electronically to cardnojobads@gmail.com with the subject line **Request for Quotes: Supply of Bitumen**,

or by hard copy to:

**USAID Feeder Roads and Alternative Maintenance Program (FRAMP)
Ministry of Public Works Compound
Lynch Street
Monrovia, Liberia**

Quotes must be submitted by 2pm (local time) on **24 January 2017**.
